
Joomla Tag Component Feature Requests

Posted by admin - 2008/08/10 02:45

If you have a feature request for the Joomla Tag Component or Joomla Tag Cloud Module, please add it here:

Accepted Feature Requests:

- Control Pages the Tags display on.
 - Control the user groups allowed to add tags.
 - support for SEF Advanced.
 - be able to create a menu link pointing to a specific tag.
 - module to show the articles tagged with a single tag, or group of tags
- =====

Hi

This could be one of the most useful components for Joomla!!!

1. I would like to see support for SEF Advanced.
2. I would like to be able to create a menu link pointing to a specific tag.
3. I would like a module where the title of the articles for a certain tag or tags will be shown. One should be able to enter the tag or tags in the module back end and then the module will show all the articles with that tag or those tags.

Best regards,
Thomas

PS. keep up the good work. As I said, this could be one of the most useful components for Joomla which lacks the functionality of tags. THANK YOU!

Thanks for the ideas. I've added them to the list of upcoming features.
