
Unable to change parameters

Posted by rowby - 2008/11/05 15:10

Hello,

I am using the latest version of Tagbot, 1.0.8Beta with Joomla 1.x.

But even though I change various parameters in the plugin, the changes doesn't show up on the page itself.

For example, even though I have Display location set to "After" it shows right under the article title (in my Joomla blog page). And even though I have Display Text set to something else it still says "Tag it"

Here's the link: <http://www.legalmetro.com/Metrolink/>

ALso how can I change it so the tags are shown horizontal instead of stacked on top of each other vertical?

=====

Hi,

Is the Joomla Content Cache enabled? If it is then your changes will not show up until after the cache has expired. The expiry is set in the global configuration.

Thanks-that fixed it. Works really nice!
