## Tag Not Found

Posted by echobrin - 2008/11/24 16:02

---

When I click a tag in the tag cloud, the first page of tagged items displays correctly, but I get the following error when I try to view the next page:

Fatal error: Tag Not Found in /components/com\_tag/tag.tasks.php on line 122

Thanks in advance!

Thanks in advance!

Looks like its a bug in the component.

In the file: components/com\_tag/tmpl/tag.html.php change the line 105 to:

```
echo $pageNav->writePagesLinks('index.php?option=com_tag&tag='.$tag.'&Itemid='.$Itemid);
```
