
Regarding display of last modified on

Posted by snip07 - 2008/12/12 23:34

Hi I need help on the after content sample code I tried it but it wont display anything on my site. I use joomla 1.5.

I want the Last modified on displayed at the bottom of every title of the article when an article is modified. Thanks!

Which event did you add the code to, onprepare?

Could you post the code please.

The sample on your page. this one

1.

Is that in Joomla1.5?

It would be \$article for every \$row in Joomla1.5

its Joomla 1.5

Ok thanks!

It worked so how do I display the date like this?

Last modified on: 17 December 2008

Here is how to change the date format globally in Joomla.

http://docs.joomla.org/How_do_you_change_the_date_format%3F

Then you can use that date format. Eg:

```
JHTML::_('date', $article->modified, JText::_('DATE_FORMAT_LC2'));
```

You would do this instead of just printing `$article->modified`.

Re:Regarding display of last modified on

So where do I put `JHTML::_('date', $article->modified, JText::_('DATE_FORMAT_LC2'));`?

I use joomla 1.5.

I want the Last modified on displayed at the bottom of every title of the article when an article is modified.

Re:Regarding display of last modified on

Try using :

```
$article->text = JHTML::_('date', $article->modified, JText::_('DATE_FORMAT_LC2')).'  
'.$article->text;
```

or similar.

That is, just "prepend" date before the `$article->text` variable.
