## mosLoadModules On Prepare

Posted by scorrea5 - 2008/08/12 10:33

---

Hello... when i add the mosLoadModules on prepare..to the end of an article.. this appear over the title ... and no in the end of an article...

Why is this problem??

I don't think the function mosLoadModules() has any return. It only "echo"s its content.

So you have mosLoadModules echoing the module content, then returning null. So you see the echoed content first, and nothing appended to the article.

You might want to use the "After Content" event. That will add the output after the article, in the order of the plugins in the Administration Panel.

If you want the output right after the article, then you can use the onprepare event, and buffer the output of your mosLoadModules() call, using output buffering:

```
$joomla_out = ob_get_contents();
ob_clean();
mosLoadModules ('position', 2);
$modules_out = ob_get_contents();
ob_clean();
```

```
echo $joomla_out;
```

```
$row->text = $modules_out;
```

Not the most efficient way, but it should work.

Excelent! Very Thankz!

Replace this code

```
$joomla_out = ob_get_contents();
ob_clean();
mosLoadModules ('position', 2);
$modules_out = ob_get_contents();
ob_clean();
```

```
echo $joomla_out;
```

```
$row->text = $modules_out;
```

For this (missing dot):

```
$joomla_out = ob_get_contents();
ob_clean();
mosLoadModules ('position', 2);
$modules_out = ob_get_contents();
ob_clean();
```

```
echo $joomla_out;
```

```
$row->text .= $modules_out;
```

Another question...

Can I show this plugin in the article only? Because appear in the show of all articles in the page of categories...

Sure..

In your code, check if you are on an article page. To do this you test for the URL parameters "option" and "task". The parameter "option" should be set to "com\_content" and "task" should be "view".

eg:

```
if (mosGetParam($_REQUEST, 'option') == 'com_content' && mosGetParam($_REQUEST, 'task') == 'view') {
// put your code in here..
}
```

Hello again!!! how i can do the same but for joomla 1.5 ????

thankyou!!!!
