## joomla 1.5

Posted by trichnosis - 2008/11/07 06:03

---

Hi;

I'm currently using your tag component on a Joomla 1.0.x . i have over 340k tags on my jos\_tag table.

i want to migrate to Joomla 1.5 now but i want to continue using the tag component. is there any joomla 1.5 ? (it's not important an alpha version or a beta version or legacy competitive) .

if yes, can i take it to test?

Regards

=====

Hi trichnosis,

There is no Joomla1.5 version of the Tag component at the moment. I will try and get a Joomla 1.5 Legacy version available ASAP.

i have modified your sef\_ext.php file. do you want me to send it?

Thanks

Hi;

I'm sorry for being late:) .

i have sent 2 files to your email
