
What version are you in?

Posted by rock3 - 2009/06/23 16:35

I am developing a site and use joomla 1.5.11, jomsocial 1.2.202, and rockettheme template replicant2. I am interested in using your chat product but want to make sure it will be compatible with what I am using.

Anyone going to answer my post???? I really need to find a chat solution and like what I see of yours but I won't buy it until you give me a few details.

Hello rock3,

At the moment the chat does not support JomSocial. We are about to release a beta of a version that supports JomSocial, but it will take a while to get a stable version.

The chat should work fine with replicant2.
